DIVERSITY BY VULCANIZED FIBRE, SPECIAL PAPER AND PULP

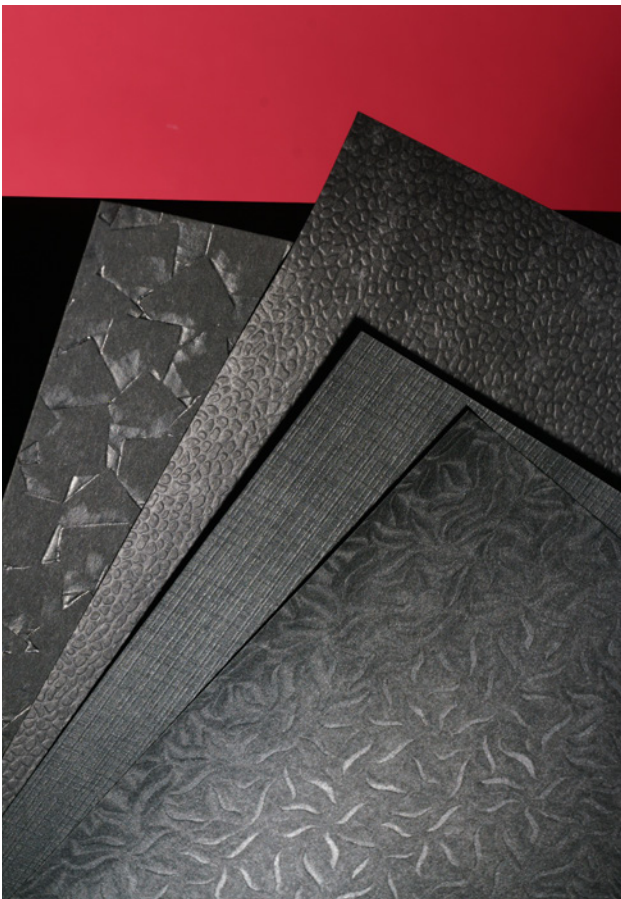

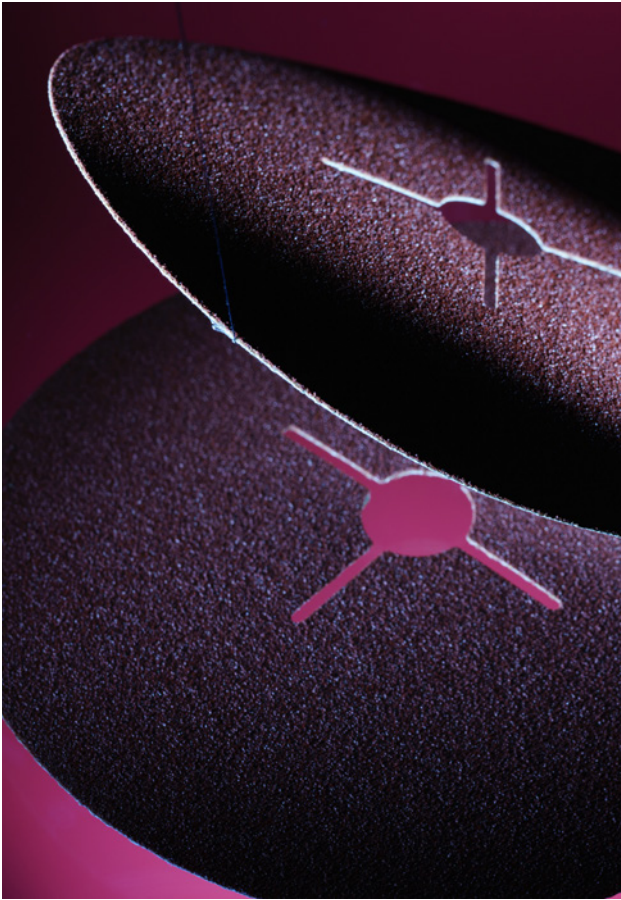

QUALITY FROM SINGLE SOURCE

DYNOS delivers approved quality products for industrial processes based on three cornerstones:

- Vulcanized Fibre for safe and economical grinding and technical applications
- Special papers for manifold applications – from abrasives via office to gastronomy
- Pulp solutions for sustainable textile production with recycled cotton yarns

Complete product portfolio of DYNOS Group is based on natural and recycled materials: Cotton and recovered paper – Vulcanized Fibre is a bio-based composite for miscellaneous applications. By working in sustainable circles we are producing efficient base materials in transparent and certified processes for challenging industrial customers worldwide.

Trade Label	Base material	Benefits
DYNOS® P, MP-S, MP, M DYNAL® HC, C	Efficient vulcanized fibre for the abrasive industry	worldwide approved backers for high-quality grinding discs: exceptionally resilient, heat-resistant, break-proof and flexible usage
DYNOS® E DYNOS® T	Vulcanized Fibre for manifold technical applications	Ideally for electrical insulation (transformers, resistant fuses, insulating, non-conducting)
DYPAL	Quality paper-based backers for abrasive industry	for paper-based abrasive backers, optimized removal strength, economical
DYMAR	Classic marble paper for paper manufacturer	Natur instead of plastic: for classic folders – durable and abrasion-proof
DYBAT	Separator paper for battery production (12V)	Acid-proof, durable and heat-resistant
DYCOL	Colorization of special paper, completely compostable	premium napkin paper for high-end gastronomy – sustainable and ecofriendly
DYPULP	Rags and linters from recycled cotton for textile production	new yarns upcycled for textile production in circular economy: sustainable and preserving resources
DYTEC	Premium labeling paper for cut-off and grinding wheels	outstanding offset printability, smooth surface, significant performance

DYNOS is leading industrial partner for grinding, technics and textile worldwide. Our products from recycled raw materials – vulcanized fibre, special paper and pulp – setting the standards in quality, diversity and sustainability.
